The Health Council Launches New Health Service Provider Register

(Hamilton, Bermuda, Tuesday, 9th July 2019) – The Bermuda Health Council announces a newly launched health service provider register. This interactive register offers a more efficient and simple way to connect people and registered health service providers without the need to switch between multiple platforms.

As a part of the Provider Advantage Programme (PrAP), the Health Council is providing this tool to better assist health service providers and the general public in finding and receiving the care they need. This register will allow providers to better communicate with residents of Bermuda, and serve as an essential resource for those not yet familiar with the health services provided in their parish.

David Rogers, Project Manager, Health Technology and Innovation at the Health Council, said: “By providing cost-effective resources for health professionals, we seek to support them on the back end so that they can spend the most time where they want to be; in front of their patients, focused on providing quality care.”

We have updated the way registered health service providers information is viewed with a new look, and we hope to add many more providers and features to the online experience in the near future. With our new navigation feature, we are making it easier for users to find the information they need with just a few clicks.

An example of Health Service Provider Register follows below:

The current features available in the register are as follows:

- Search Tool - Search by keyword and parish to find a health facility by desired health service in your area
- Bookmark – Create shortcuts to your favourite health facility's and navigate to them in seconds
- Print – Download a copy of a health facility's information with a simple click

To learn more about the Provider Advantage Programme and how to register, visit our [website](#). To find a health service provider in your area, click to view the register [here](#).

About Bermuda Health Council

Established in January 2006, the Bermuda Health Council (Health Council) is tasked with regulating, coordinating and enhancing the provision of health services in Bermuda. Led by a Board representing a broad range of sectors in Bermuda's community, and staffed by a team of committed professionals, the Health Council works with health system stakeholders towards achieving a quality, equitable and sustainable health system.
